

MODELING MUCOSAL IMMUNITY

SUMMER SCHOOL & SYMPOSIUM
JUNE 9 - 13, 2014

LOCATION

Virginia Bioinformatics Institute
Virginia Tech
Blacksburg, VA

DESCRIPTION

The Center for Modeling Immunity to Enteric Pathogens (MIEP) is a NIAID-funded program with the mission of understanding the mechanisms of action underlying immune responses to enteric pathogens. MIEP and the three related Centers of the NIAID Modeling Immunity for Biodefense Program provide Summer Schools each year for interested graduate, pre- and post-graduate students. June 9-12, 2014, Modeling Mucosal Immunity will introduce immunologists to the application of modeling tools and techniques for hypothesis generation and testing.

The Summer School will be followed immediately by a 1.5 day Symposium.

DETAILS

Travel awards will be available for students.

Details on application and registration will be posted here as they become available.
